General

1.1 Navigation bar

LiveWire provides an easy to navigate UI. The main pages consists of a navigation bar at the bottom of the screen. There are 5 possible main pages including the page currently selected. They all contain this navigation bar.

1.2 Search bar

At the top right of the screen will be a search bar used to search for events. All 5 main pages contain this search bar.

2. Page Walkthrough

2.1 Sign in/Register page

The Sign in/Register page consists of two edit text boxes that prompt you to enter your "email" and "password". The button that is located nearest the bottom of the page that reads "Login" which is what any existing user will press once they have entered in their account details. If a user doesn't have an existing account they have the option to press the "Signup" button which will bring them to another page to register an account. Once either process is complete the user will be brought into the LiveWire homepage. The image below shows this page.
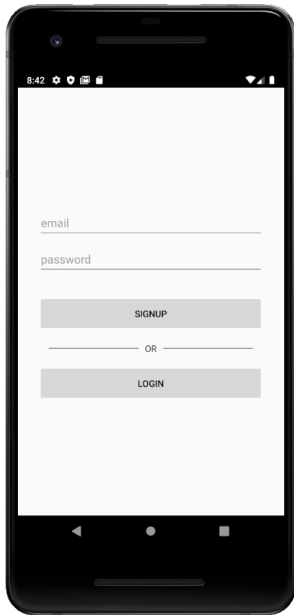

2.3 Profile page

The profile page can be found on the navigation bar located at the bottom of your screen. It is the button second from the left on the navigation bar. The page consists of the users avatar picture and located alongside it is the users name, living area and bio. At the top right of the screen under the search bar will be a button that allows you to create a public post. The main portion of the page consists of a scrolling page that displays all posts that the user has made throughout their LiveWire career.The image below shows this page.
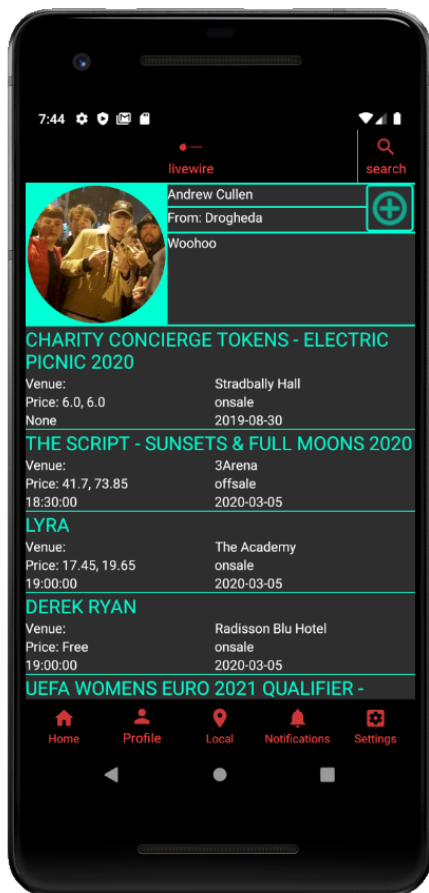

2.4 Create posts

The create posts page can be found from the profile page at the top right of the screen under the search bar. The page consists of an exit button at the top left of the screen under the banner. Just below the exit button is an edit text box that prompts the user to "write something..." this text will appear with their post when posted. The main portion of the page is where an image can be added to the post. Finally, below the add image is the "Post"button which will be pressed when the description and the image has been added. This will make the post public to other users. The image below shows this page.
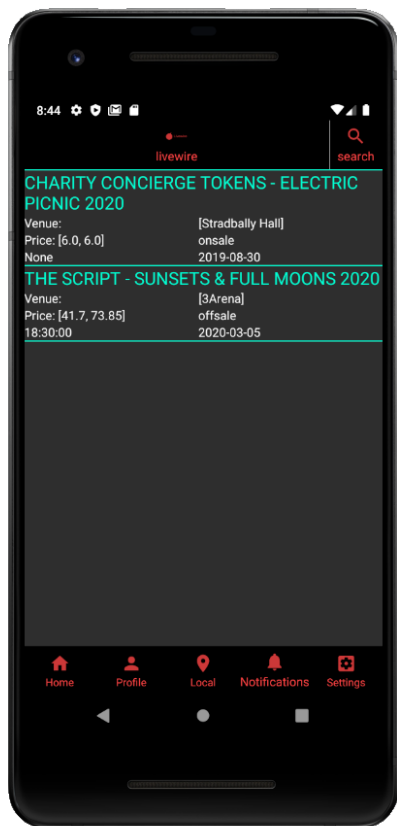

2.5 Local page

The Local page can be found on the navigation bar located at the bottom of your screen. It is the button located in the middle of the navigation bar. The page consists of a scrolling feed populated by events in the users local area. Each event displays the name of the event i.e. the artist playing/ Festival name along with the venue, the price whether the tickets are on sale or offsale followed by the time and the date.The image below shows this page.
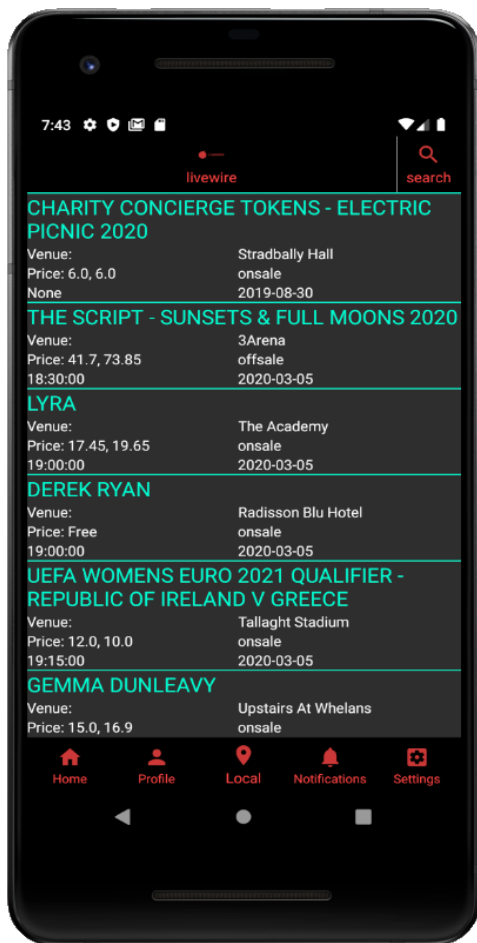

2.6 Notification page

The Notification page can be found on the navigation bar located at the bottom of your screen. It is the button located second from the right on the navigation bar. The page consists of a scrolling feed populated by events filtered to the users notifications preferences located on the settings page. Each event displays the name of the event i.e. the artist playing/ Festival name along with the venue, the price whether the tickets are on sale or offsale followed by the time and the date.

2.7 Settings page

The Settings page can be found on the navigation bar located at the bottom of your screen. It is the button located farthest to the right on the navigation bar. The page consists of 5 buttons and is split into two sections "Preferences" and "Plugins", starting from the top is a button to "Change notifications preferences" followed by a button to "Change LiveFeed preferences". The next section consists of 3 more buttons they read "Link Spotify for recommendations and more" and "Link location services find concerts and content near you". The first button links the users spotify
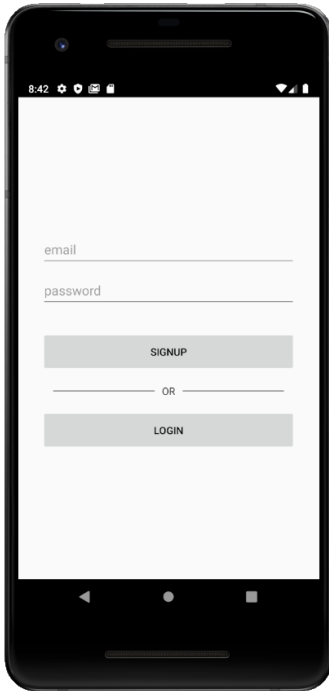

account to their LiveWire account and requests them to accept the terms of use. The third button requests access to the users location to allow the app to recommend events near the user.
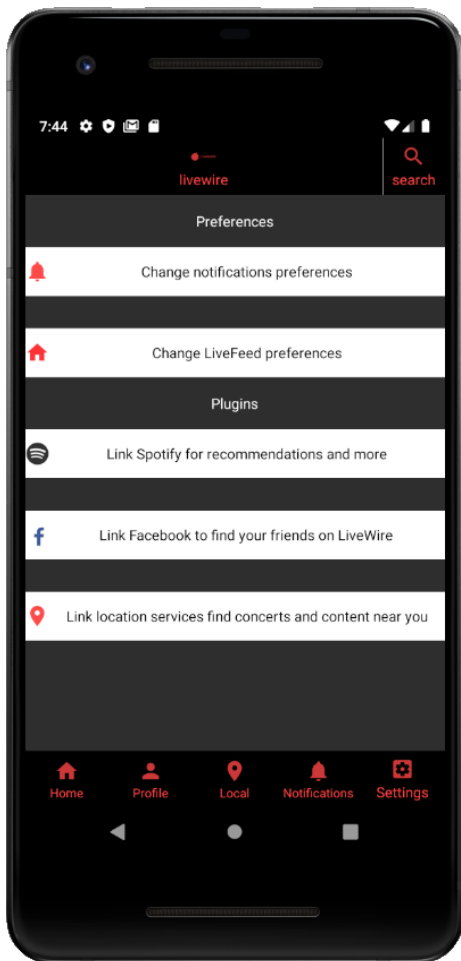

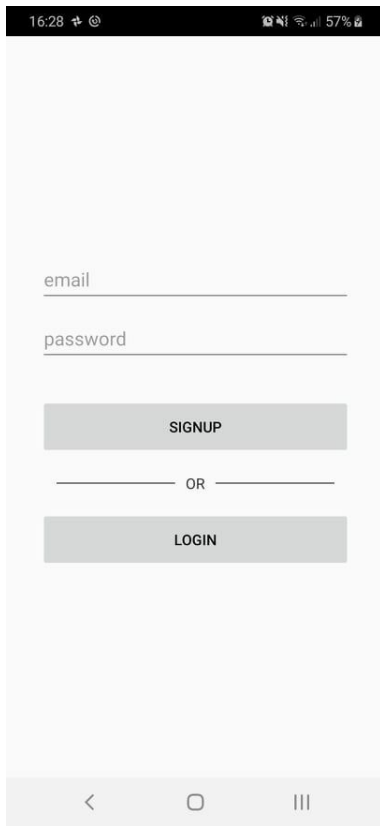

3. Functionality Walkthroughs

3.1 Sign up
